During the interview, the Examiner agreed that the art of record is not seen to disclose or suggest the claimed feature that the main lookup table has a smaller number of entries than the number of all possible combinations of the first and second input (or color difference) values by utilizing symmetry of the output (or saturation) value for the first and second input (or color difference) values. In addition, the Examiner indicated that an updated search would be performed.

No other matters being raised, it is believed that the entire application is fully in condition for allowance, and such action is courteously solicited.

Applicant's undersigned attorney may be reached in our Costa Mesa, California office at (714) 540-8700. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

/John D. Magluyan/
